

**Maria Sohail – Graduate Programme McLaren Automotive
Ursuline Student 2012-2019**

After completing A Levels in Mathematics, Further Mathematics, Art, and Physics, I studied Mechanical Engineering with an Industrial Placement at Queen Mary University of London.

As part of my degree, I completed a placement year at Jaguar Land Rover, working in the Vehicle Efficiency team, where I developed a simulation tool for target setting that was integrated into the larger system. I gained hands-on experience which was complimented by leading Suspension and EV teams within m university's Formula Student team, leaving with being the best scoring London team in 2024!

I am currently part of the Graduate Program at McLaren Automotive, where I am continuing to develop my expertise in cutting-edge automotive engineering and innovation.
